- Tenali, Guntur, A.P-522324.

Summary

Motivated and detail-oriented graduate with a strong foundation in Java, C, and frontend development. Seeking an opportunity to leverage technical skills in a dynamic organization while contributing to team success and personal growth.

Skills

Frontend technologies: HTML, CSS, JavaScript.

Database: Oracle SQL, PL/SQL.

Backend Technologies: Java, C, Python, Spring Framework (Spring MVC, Spring Data JPA, JDBC).

Version Control Tools: Git

Operating Systems Commands: Linux(Basic commands)

Education

Vignan's LARA Institute of Technology & Science

Bachelor of Technology | Mechanical | (Distinction)

GPA: **7.92** / 10

Guntur

08/2020 - 06/2024

NRI Junior Kalasala

Intermediate | GPA: **8.4** / 10

Tenali

06/2018 - 03/2020

Narayana EM School

SSC | GPA: **9.8** / 10

Tenali

06/2017 - 03/2018

Experience

Programmer Analyst Trainee, Cognizant - Chennai, India

June 2025 – present

- Completed training as a Programmer Analyst Trainee at Cognizant, gained hands-on experience in Java, SQL, Spring Boot, Spring MVC, Spring JPA, and JWT for building secure and scalable web applications.
- Developed a full-stack project using advanced Java and Spring frameworks, applying design patterns, Agile methodologies, and version control with Git to deliver a robust solution.

Academic project

MECHANICAL PROPERTIES OF 3D PRINTED CARBON FIBER REINFORCED POLYMER COMPOSITES

01/2024 - 05/2024

The project involved analyzing factors influencing **tensile strength, flexural strength, impact strength, thermal properties, wear, dielectric strength, hardness, vibration, surface roughness, density, water absorption and SEM**. Optimized printing parameters and material compositions to enhance the performance characteristics of composites, aiming to provide insights for advanced engineering applications by 3D printing technology.
